VALUING A PRIVATE GROUP FROM PUBLIC FILINGS

What is Russia's former McDonald's worth?

The operating company behind 960+ restaurants files statutory accounts every year. This is what they show — and what the business is worth.

218.6

₽bn revenue 2025

14.4

₽bn net profit

years of filings

October 2026

Handed over for a symbolic sum. Now ₽219bn of revenue.

- In May 2022 McDonald's sold its 850 Russian restaurants to Alexander Govor for a symbolic consideration, took a $1.2bn write-off and kept a 15-year buy-back option.

- The operating entity never changed: LLC Sistema PBO, TIN 7710044140, incorporated 1996 — the same legal entity that traded as McDonald's.

- It files statutory accounts every year. So the question can be answered from public records alone: no insider data, no management access.

- What follows is the filings themselves, then four ways to value what they show.

The handover year is visible in the accounts

₽bn, Russian statutory accounts

Year	Revenue	Net profit	Equity
2021 as McDonald's	75.2	2.0	21.7
2022 handover	73.5	(11.3)	41.5
2023	155.7	14.2	41.5
2024	187.4	17.0	32.0
2025	218.6	14.4	32.2

Revenue has tripled in four years. Profit did not follow in 2025: cost of sales rose 19% against 16.7% revenue growth.

Equity fell from ₽41.5bn to ₽32.2bn because almost all profit is paid out — ₽14.2bn of dividends in 2025 alone.

The next two pages are the filings these figures come from.

Two things matter for the valuation. Depreciation is not disclosed in this form, which is why no EV/EBITDA appears anywhere in this document.

And the company carries real debt: ₽13.9bn of short-term borrowings against ₽11.5bn of cash, with ₽3.7bn of interest paid in 2025.

Source: GIR BO (bo.nalog.gov.ru). Reproduced as filed; line names translated.

Adding up the entities would overstate the group by 88%

- Valuing all six entities and summing them gives ₽96.1bn. That number is wrong, and the filings show why.
- Klub Otel's revenue line is the dividend from Sistema PBO — ₽14.2bn in 2025 — and its assets are the shares in PBO itself. JSC VIT does the same one tier above.
- The dividend trail reconciles across three sets of accounts: PBO paid ₽14.2bn, Klub Otel booked ₽14.2bn, JSC VIT booked ₽15.6bn.
- Counting the operating companies only gives ₽51bn.

Note: Double counting is the most common error when a group is valued entity by entity

2022 does not belong in the earnings base

- A plain five-year average profit is ₽7.3bn, dragged down by the ₽11.3bn loss booked in the year of the handover.

- That loss is write-downs and one-off costs of transferring 850 restaurants, not trading, and it will not repeat.

- Normalised base — the 2023 to 2025 average — is ₽15.2bn.

- Everything below uses the normalised base, and the gap to the mechanical average is disclosed here rather than buried in a footnote.

Four cross-checks, not one number

Approach	Input	Value, RUB bn
Net assets (cost)	Equity at 31.12.2025	32.2
Capitalised earnings	₽15.2bn / 22%	69.0
Peer multiples	P/E 5–6x: X5, Lenta, Magnit	72–87
Dividend capacity	₽14.2bn / 22%	64.5

Discount rate: the 10-year OFZ yield is 16.2% and the key rate 14%, so 22% is the risk-free rate plus equity, size and illiquidity premia, less long-term growth.

A Western reader may find 22% punitive. It is not: a Russian risk-free rate of 16.2% leaves roughly six points of equity premium, which is thin rather than generous.

Peer multiples: VTB Capital and T-Investments research, 2026. OFZ curve as of 15.10.2026.

₽50–87bn, central estimate near ₽67bn

₽67bn	$0.8bn	4.4x	$1.2bn
central estimate	at RUB 84 / USD	implied P/E	McDonald's write-off

Note: The asset handed over for a symbolic sum is now worth roughly two thirds of that write-off

What this is not

- Russian statutory accounts, not IFRS: no lease capitalisation under IFRS 16, no brand or goodwill on the balance sheet. An IFRS view would look materially different.

- JSC shareholder registers are closed in Russia, so the top tier is stated as filed on incorporation, not independently verified.

- LLC GiD's latest available accounts are for 2023 and it is carried at a nominal value.

- A desktop valuation from public sources: not an appraisal report under FSO or RICS standards, and not investment advice.

How it was built

- Ownership and perimeter from EGRUL, the Russian companies register.

- Five years of balance sheets and income statements pulled from GIR BO, the state register of statutory accounts, for every entity in scope.

- Structure chart and workbook generated automatically; the judgement — perimeter, normalisation, discount rate — made by hand.

- The full workbook, with the statements of all six entities, the ownership map and the valuation build-up, is linked in the featured section of this profile.
